STRATEGIC OBJECTIVE #4

(Management of Productive, Life-Sustaining Natural Resources Strengthened)

USE OF BIO-DIESEL PUSHED. Makati Mayor Jejomar C. Binay (second from right) joins Rosario Calderon (center), senior technical advisor of the US Agency for International Development-Philippines' Office of Energy and Environment, during the smoke emission testing of vehicles using coco methyl ester (CME), also known as biodiesel, at the city hall quadrangle. The city government agreed to initially load 10 of its vehicles with CME, but the number may be expanded to include all 500 city vehicles if the results are favorable and if there is a guarantee of supply. With them is Makati Department of Environmental Services Chief Danilo Villas (left).
